

Publishing to RSLogix

In this section you will see how to publish the definition of a DELMIA Automation project to RSLogix. Follow the instructions of the wizard to select the data to publish.

The command **Synchronize with RSLogix 5000** is available in **CLM Device Logic Design** or **CSM Device Control Connection**.

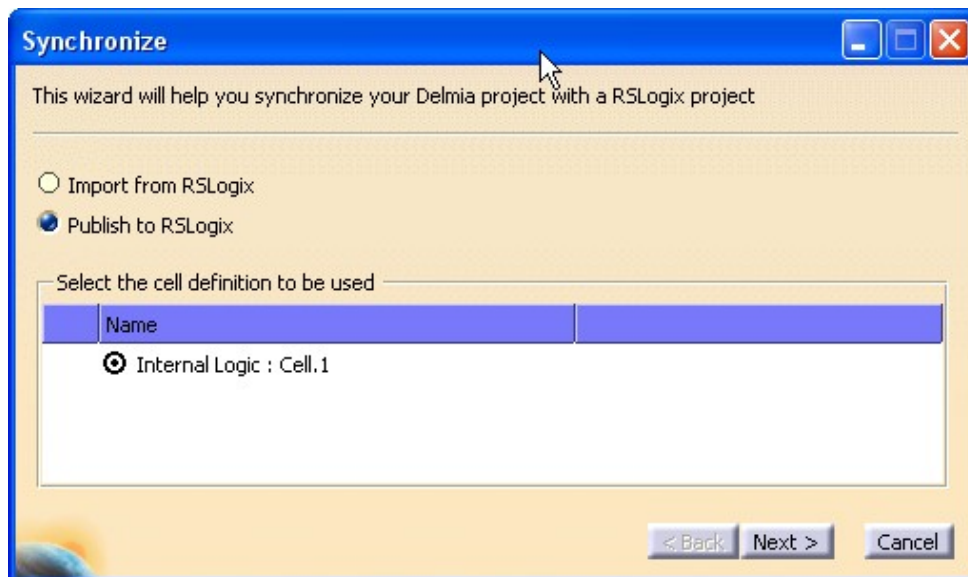

- If the publishing is done from Device Logic Design, the Smart Device published is the root product.
- If the publishing is done from Device Control Connection, all the Smart Devices available in the selected Execution Environment are published.

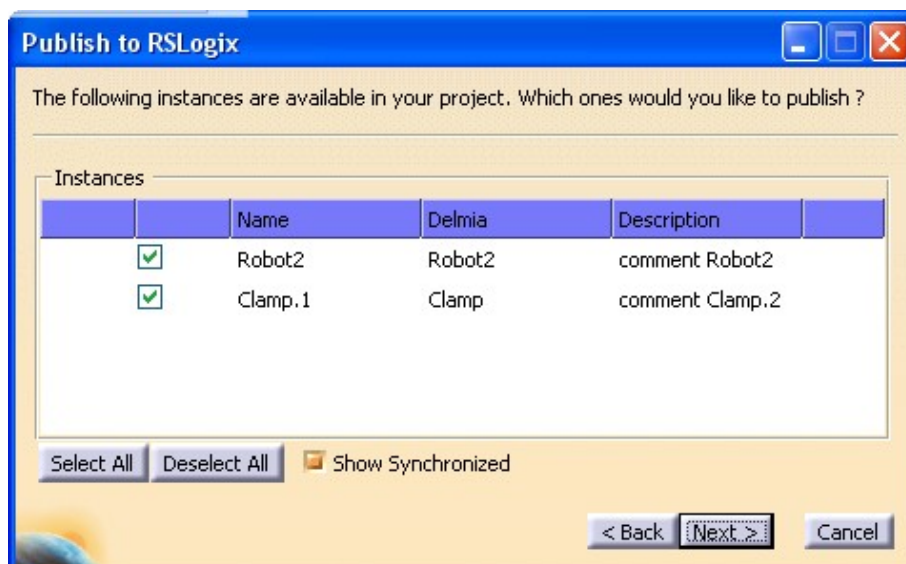

The **CLM Device Logic Design** workbench should be opened and a blank .CATProduct file should appear.

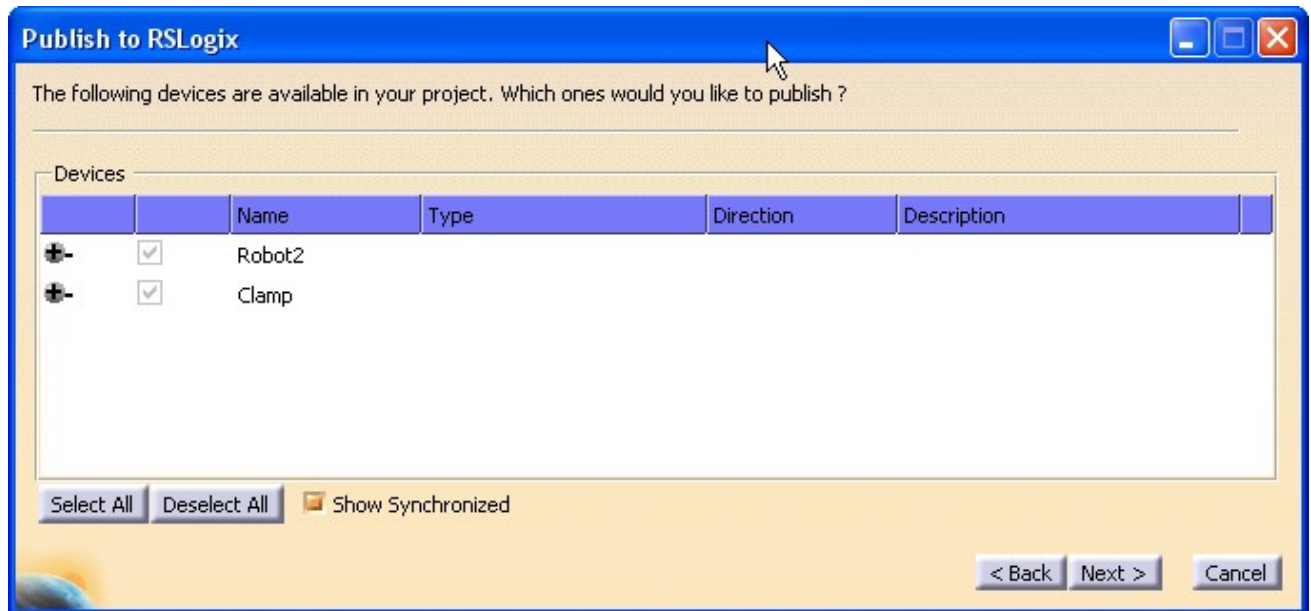

1. Open Cell.CATProcess from the samples folder.
2. Double-click Cell in the PPR tree to switch back to the **CLM Device Logic Design** workbench.
3. Click **Synchronize with RSLogix 5000** in the **Control Design Exchange** toolbar and select Cell (cell.1) in the PPR tree.
The **Synchronize** dialog box is opened.
4. Check **Publish to RSLogix**. The root product is select by default.

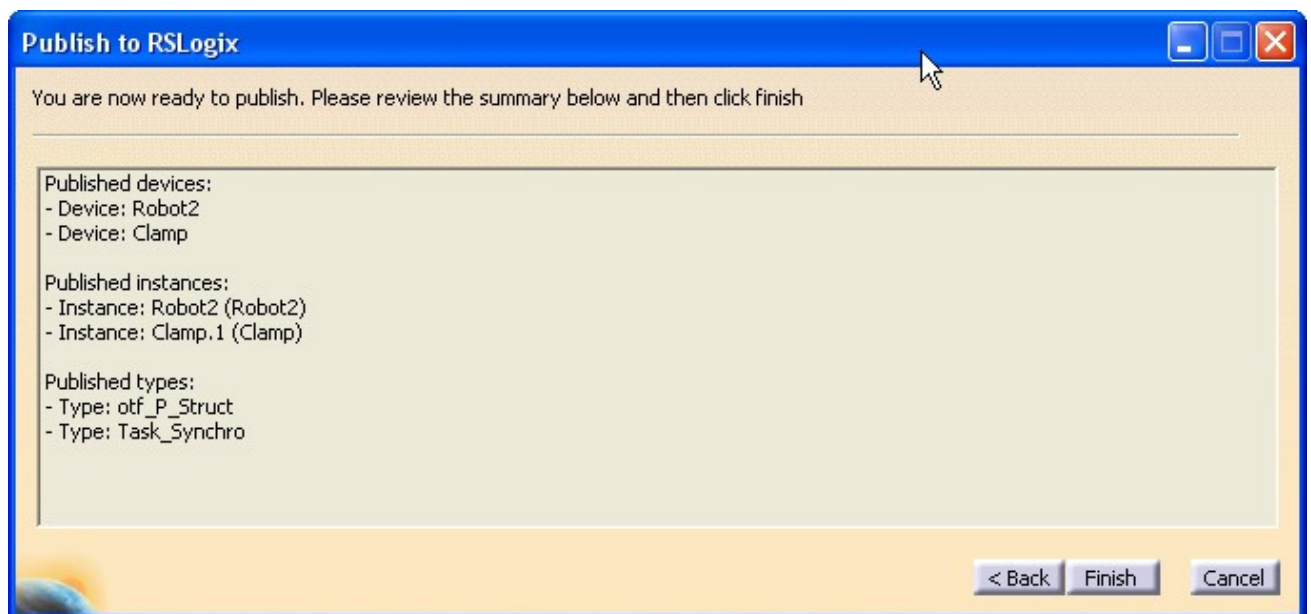

5. Click **Next >**. The list of all instances of the root product are selected by default.

6. Click **Next>**. The reference of the instances are displayed in the list.

7. Click **Next>**.

8. Click **Finish**. The definition can be loaded in the RSLogix 5000 project.

Note: The import is described in the RSLogix 5000 User's Guide.
