

# CaminoSoft Corporation

**Company overview:** CaminoSoft Corporation (OTC.BB: CMSF) is a developer and manufacturer of software solutions that store, manage, and safeguard vast quantities of data generated in a wide range of businesses and applications. The company's Information Lifecycle Management solutions for Microsoft Windows 2000/2003 and Novell NetWare & GroupWise environments include comprehensive administrative policies that allow organizations to reclaim production storage resources, dramatically reduce backup and recovery time, control file retention, and achieve regulatory compliance. CaminoSoft has established alliances with industry-leading technology partners, and the company markets its Storage Management and High Availability solutions worldwide through commercial distributors, value-added resellers, and systems integrators.

**Product name:** CaminoSoft Managed Server HSMTM – Tivoli Edition v5.2.3

**Operating environments supported**

AIX®	Linux®	OS/400®	OS/390®	Microsoft® Windows®	Sun® Solaris®	HP-UX®	Novell® Netware®
				Windows XP			x
				Windows 2003 Server, Windows 2000			

**Product description:** CaminoSoft's Managed Server HSM – Tivoli Edition provides a straightforward, cost-effective solution for managing data storage across multiple tiers, including the DR550, Tivoli storage pool devices, SANs, SATA RAID subsystems, NAS target appliances, and general purpose servers. The policy-driven software solution migrates seldom-accessed files to more cost-effective and/or specialized (WORM) storage targets, resulting in more efficient utilization of expensive SAN storage resources, better controlled storage growth, and reduced backup/recovery windows. This solution leverages an organization's existing investment in Tivoli software and hardware resources by making use of the storage capacity, high availability, security, protection, and compliance features

provided by Tivoli Storage Manager policies and infrastructure. The solution coexists seamlessly with Tivoli backup to help ensure consistency with customers' data protection/recovery strategies.

**Supported geos:** Americas, Europe

**Supported region:** US West, England

**Headquarters location:** California, US

**Compelling differentiation:** All servers managed from designated Windows admin workstation(s). Supports multi-server clusters. Supports unlimited storage tiers.
