Product description: IBM DB2 Content Manager OnDemand is an electronic-report-management and statement-presentment solution that enables high-volume capture of computer output and archiving of scanned documents.

Compelling differentiation: Benefits include: .

- Provide fast and easy access to customer statements stored in an ERM/COLD (electronic-report-management/Computer Output to Laser Disk) repository to quickly respond to billing, statement or policy inquiries. . Gain significant ROI by transforming high-volume output from costly print systems to electronic capture and presentation.

- View all data types from a single viewer and transform multiple printstream formats to fully integrate and leverage information across the enterprise and beyond . Streamlined, automatic distribution of selected reports and documents to authorized users

- Support call center productivity and customer self-service with instant access to bills, invoices and statements.

- Deliver electronic bill presentment and payment capabilities.
