### Operating environments supported

AIX®	Linux®	OS/400®	OS/390®	Microsoft® Windows®	Sun® Solaris®	HP-UX®	Novell® Netware®
	Linux P						
	Linux I						

**Product description:** OnBase is an enterprise content management (ECM) solution that combines the technologies of document imaging, COLD/ERM, integrated document management, and workflow into a single web-enabled application.

**Supported geos:** Americas, Europe

**Supported region:** US, England

**Headquarters location:** Ohio, US

**Compelling differentiation:** With the ability to manage any kind of document and to support an unsurpassed range of business applications, OnBase software is much more than document imaging. More than 4,500 companies are using OnBase to streamline their processes and share electronic information with their employees, business partners, and customers.
